

CREATE FLASK APP

Date	27/10/2022
Team ID	PNT2022TMID46354
Project Name	Smart Fashion Recommender Application

CODE :

The image shows a Visual Studio Code editor window with a file named `app.py` open. The code in the editor is as follows:

```
1 from flask import Flask,render_template
2
3 app = Flask(__name__)
4
5 @app.route("/")
6 def home():
7     return 'HELLO WORLD'
```

Below the editor, the TERMINAL panel is active, showing the output of the command `flask run` executed in a PowerShell prompt. The output includes environment information, a warning about the development server, and the current running status on `http://127.0.0.1:5000`. It also shows two incoming HTTP requests: a `GET / HTTP/1.1` request returning `200` and a `GET /favicon.ico HTTP/1.1` request returning `404`.

```
PS C:\Users\ELCOT\Documents\bhumi\WalaiaThiran\newww> flask run
* Environment: production
  WARNING: This is a development server. Do not use it in a production deployment.
  Use a production WSGI server instead.
* Debug mode: off
* Running on http://127.0.0.1:5000 (Press CTRL+C to quit)
127.0.0.1 - - [16/Nov/2022 20:30:33] "GET / HTTP/1.1" 200 -
127.0.0.1 - - [16/Nov/2022 20:30:35] "GET /favicon.ico HTTP/1.1" 404 -
[]
```

OUTPUT :
